1. Introduction

1.1. Background

The Leigh Catchment Group (LCG) formed in 1997 following recognition by the Landcare Groups of the Catchment that a combined and coordinated approach to management of the catchment would result in improved works and lead to an increase in funding for larger scale Natural Resource Management projects. The following groups are LCG members:

- Bamganie-Meredith Landcare Group.
- Garibaldi Environment Group.
- Grenville Landcare Group.
- Leigh Districts Landcare Group.
- Napoleons/Enfield Landcare Group.
- Ross Creek Landcare Group.
- South Ballarat Urban Landcare Group.
- Upper Williamson's Creek Landcare Group.
- Wattle Flat/Pootilla Landcare Group.
- LINCS (Linear Network of Communal Spaces) program.

Historically the Executive Committee consisted of an independent chairman, secretary, treasurer and two voting representatives from each Landcare Group. Since 2009 this has been replaced by the Leigh Catchment Board consisting of nine elected Landcare Members. There are two Landcare coordinator positions (currently equivalent to 1.8 FTE positions). The coordinators are responsible for managing projects and activities undertaken through the LCG and also provide support to the Landcare Group members. Various additional short term appointments have been employed to assist with administration and specific projects or activities.

The LCG is supported by the Department of the Environment, Water, Heritage and the Arts (Commonwealth), Department of Sustainability and Environment (Vic), Department of Primary Industries (Vic), Corangamite Catchment Management Authority, Central Highlands Water, Southern Rural Water, Greening Australia, Trust for Nature, City of Ballarat, Golden Plains Shire, Moorabool Shire Council, University of Ballarat, Ballarat Environment Network, community groups and individuals.

The current Leigh Catchment Plan was produced in August 1999 by the Leigh Catchment Group with assistance from Landcare groups within the catchment. The Plan incorporates the Yarrowee River and Leigh River Management Plans.

The Leigh Catchment Group received funding from Victorian Government's Second Generation Landcare 06-07 program to revise and update the existing Leigh Catchment Plan. The aim of the revision and update is to integrate current strategic direction, expert knowledge and community desires to enable the development of prioritised actions to protect the catchment's valuable assets and mitigate potential threats to these assets.

1.2. The Leigh Catchment

The Leigh Catchment covers an area of 890 square kilometres including the Yarrowee River which becomes the Leigh River at its confluence with Williamson's Creek. The Leigh River flows into the Barwon River at Inverleigh. The Leigh Catchment contains a diverse range of topographic features from gently undulating hills, wide valleys and river flats, to steep escarpments and rocky gorges.

The catchment supports areas of significant remnant native vegetation including forests, woodlands, grasslands and wetlands occurring on private and public land. The Leigh River supports intact corridors of riparian vegetation with important fauna habitat values. Agriculture is the predominant land use in the catchment. The urban and semi urban areas of Ballarat are also a significant component of the catchment.

Rivers and tributaries of the catchment include:

Yarrowee River

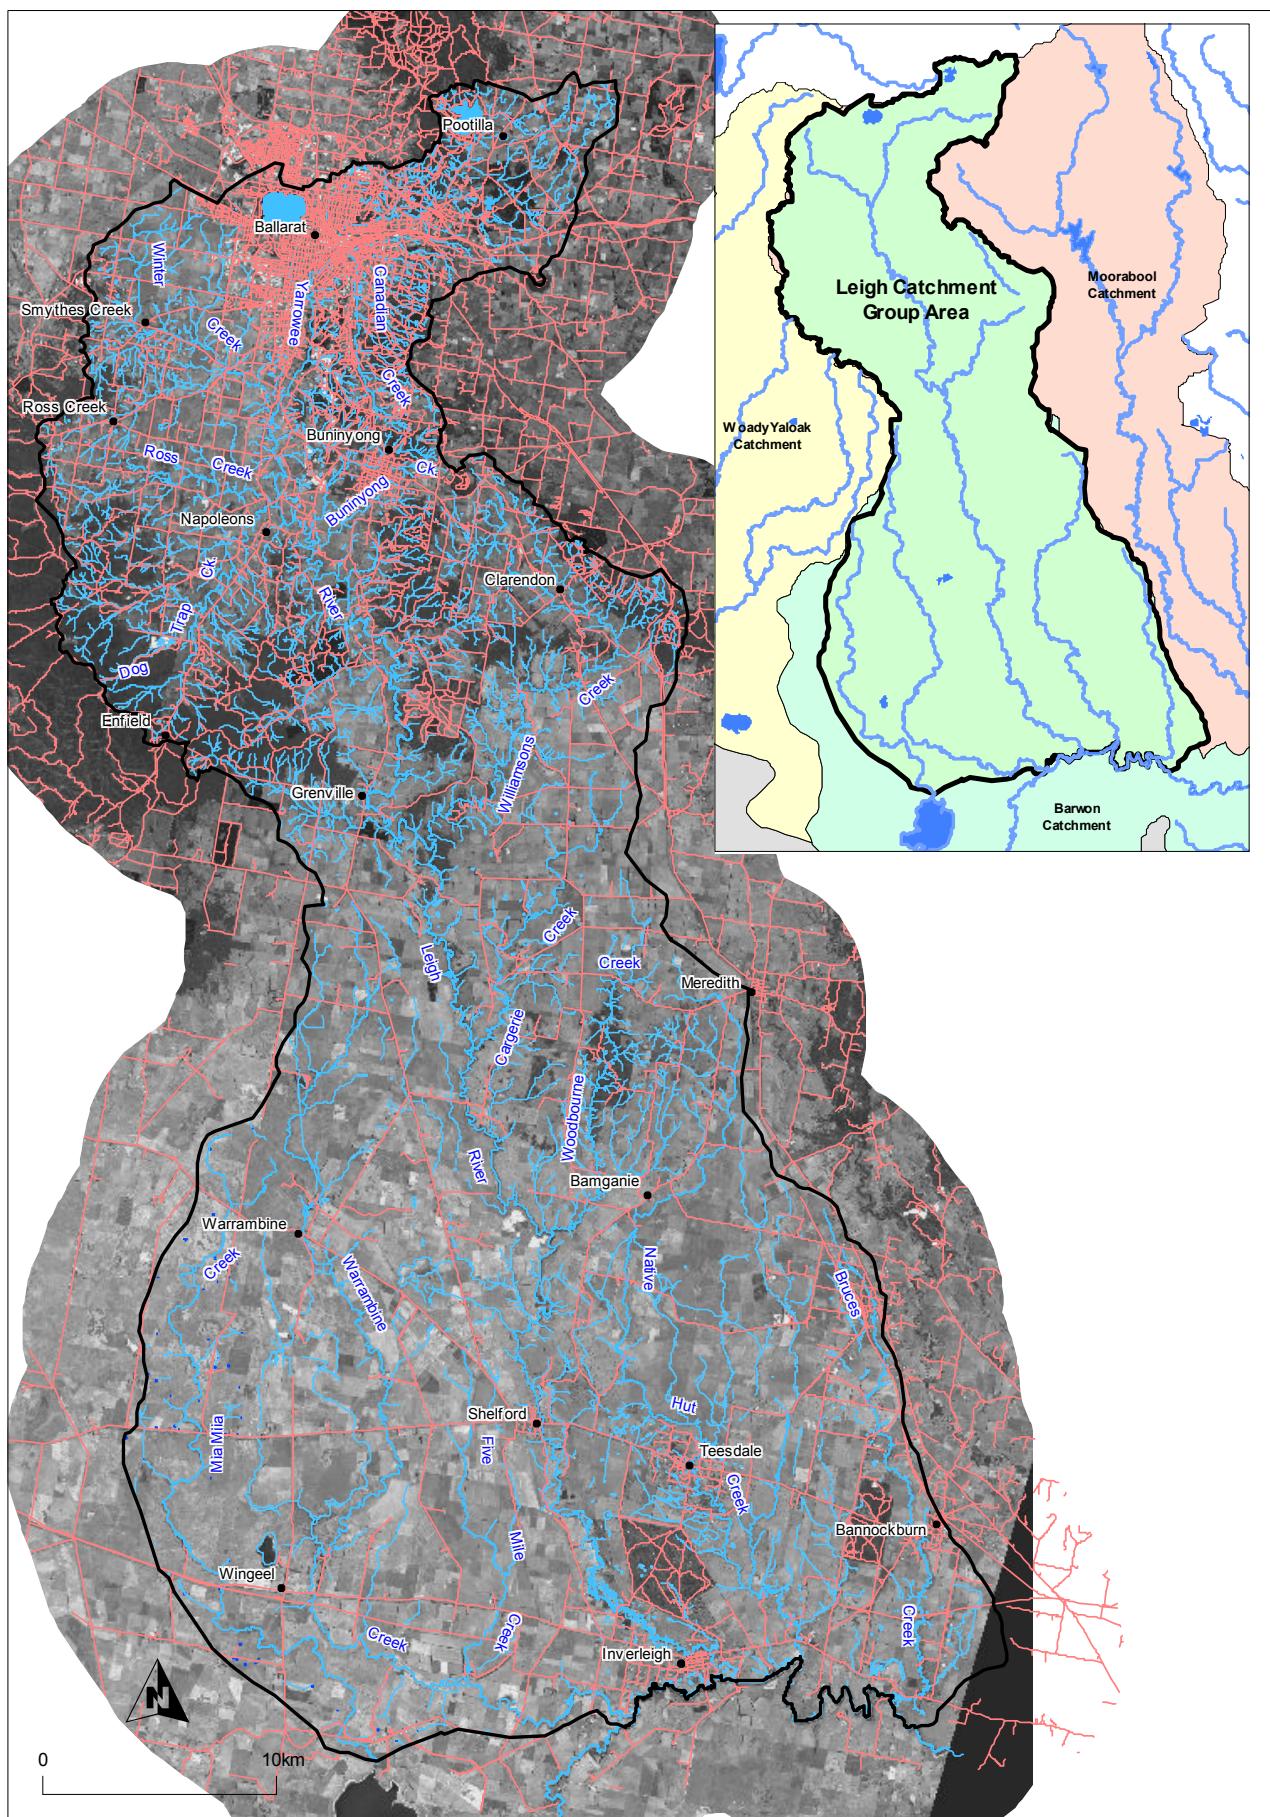

- Canadian Creek sub-catchment including Pennyweight Gully, No. 3 Channel, Specimen Vale and Warrenheip Gully.
- Urban sub-catchment including Little Bendigo Creek, Redan Creek, Water Street Drain, Black Hill Creek, Gnarr Creek, Gladstone Creek and Warrenheip Creek.
- Mid Yarrowee sub-catchment including Buninyong Creek, Dog Trap Creek, Ross Creek and Winter Creek.
- Lower Yarrowee sub-catchment including Back Creek, Monmouth Gully and Williamsons Creek.

Leigh River (begins at the confluence of Williamsons Creek and the Yarrowee River)

- Cargerie Creek
- Woodbourne/Wilsons Creek

The Warrambine Creek, Native Hut Creek, and Bruces Creek subcatchments which flow directly into the Barwon River, and the Mia Mia Creek sub-catchment which flows into Lake Murdeduke, were added to the LCG area in 2002 increasing it to 1580 square kilometres (Figure 1-1).

Figure 1-1 Leigh Catchment Group area

1.3. Purpose

The Leigh Catchment Action Plan establishes a long term direction and identifies priority actions for the protection and enhancement of natural resources within the Leigh Catchment Group area. The Leigh Catchment Action Plan (CAP):

- Incorporates strategies, priorities and direction from current local, regional, state and national plans and frameworks.
- Identifies and describes natural resource values within the LCG area.
- Identifies and describes threats to natural resources within the LCG area.
- Describes previous NRM activities within the LCG area.
- Identifies a set of actions to protect and enhance NRM values within the LCG area.
- Identifies processes and partners for implementation of NRM actions.
- Describes a monitoring and evaluation process to enable assessment and reporting of NRM projects.
- Identifies community engagement and capacity building strategies to help deliver and achieve the CAP outcomes.

1.4. Vision

The Corangamite Regional Catchment Strategy vision (CCMA 2003) lists the following key outcomes:

- A healthy environment.
- Sustainable economic use of natural resources.
- A smaller footprint.
- A planned landscape.
- Cohesive, innovative communities.
- Partnership between community and government.

In recognition and support of the above desired outcomes, the Leigh Catchment Group's vision for the catchment is:

Working together to achieve sustainable ecosystems, agriculture and communities.

1.5. Plan Development

The Leigh Catchment Action Plan is being developed through the following process:

- Review of existing catchment information and data,
- Identification of sub-catchment management areas,
- Identification and description of catchment assets/values and threats within the sub-catchments,
- Development of NRM actions required to address threats within the sub-catchments,
- Preparation of Draft LCG Catchment Action Plan document,
- Review of a Draft Plan by LCG member Landcare groups, landholders and other stakeholders (in process),
- Review of stakeholder feedback and finalisation of LCG Catchment Action Plan (to be completed).

2. Strategic Framework and Existing Information

2.1. Supporting strategies and plans

A range of state and regional natural resource management strategies, plans and policies provide a framework for the Leigh Catchment Action Plan. This framework is positioned within the broader context of National and International NRM policies and strategies. A list of the most relevant state, regional and local strategies and plans for the LCG area is provided in Table 2-1. These strategies, plans and reports contain relevant background information and provide direction and priorities for NRM activities within the Leigh Catchment.

2.2. Catchment Information

In addition to information contained in the strategies and plans listed in Section 2.1, a range of other data sources were used to obtain information on the natural resources/values and threats within the LCG area. The following databases and datasets were accessed to extract data for the LCG area:

- CAMS (Catchment Activity Management System) (DSE).
- Corangamite Catchment Management Authority GIS datasets (CCMA).
- Leigh Catchment Group Project Database (LCG).
- Flora Information System (DSE).
- Atlas of Victorian Wildlife (DSE).
- Ecological Vegetation Class GIS dataset (DSE).
- VicMap GIS datasets including topographic, waterway and wetland, road, and Victorian Planning Scheme layers.
- Roadside mapping databases

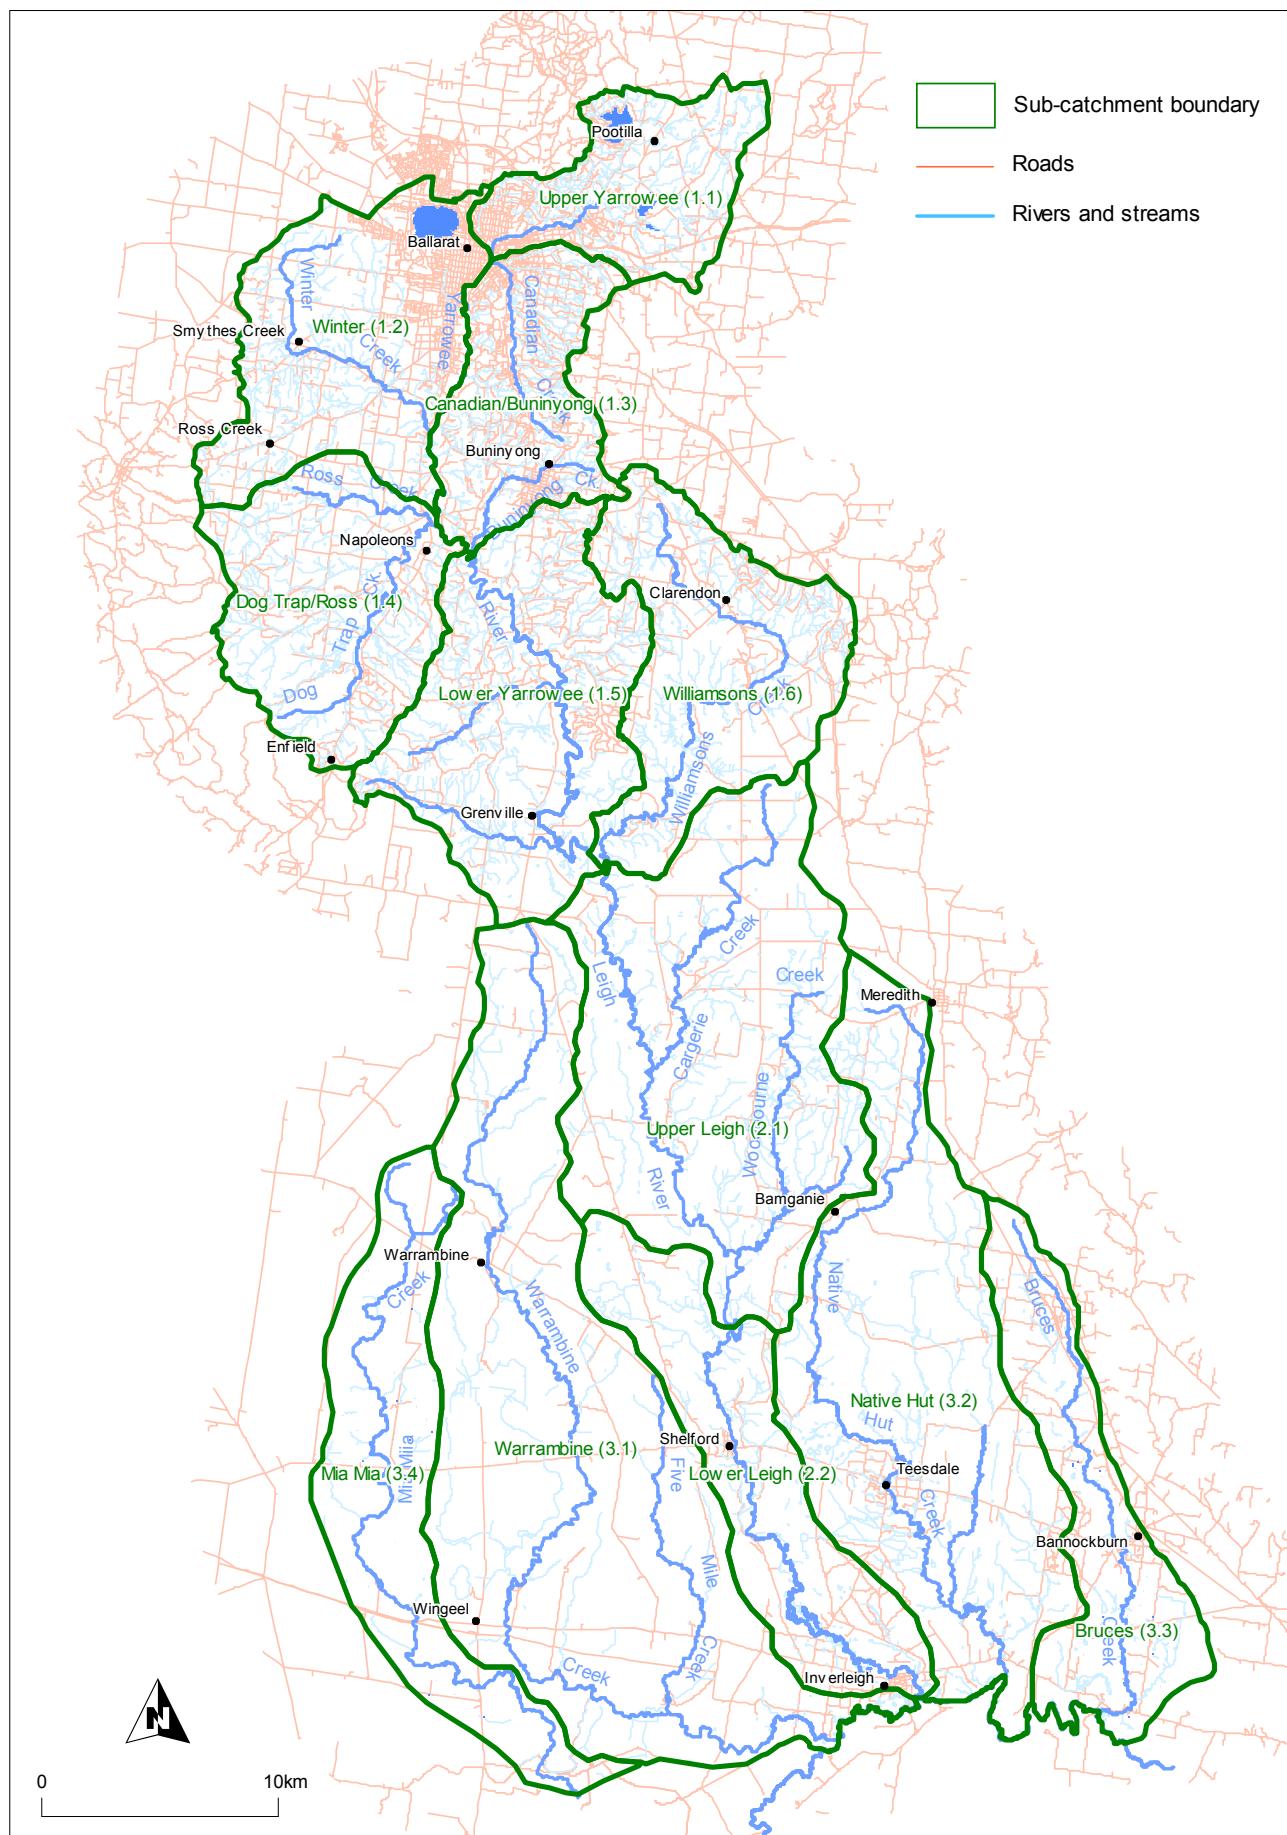

2.3. Sub-catchment Management Areas

The Leigh Catchment was divided into eight sub-catchments to enable the identification of assets, threats and actions at a scale that will allow targeted management of natural resources within the Leigh River catchment. The sub-catchment areas were developed with consideration of hydrological boundaries, land type and land use features. A further four sub-catchments of the Barwon River neighbouring the Leigh Catchment that are currently part of the Leigh Catchment Group area are also included. The sub-catchments are listed in Table 2.2 and shown in Figure 2-1.

Table 2-2 Sub-catchments of the Leigh River

ID	Sub-catchment Name	River Catchment	River section	Area (hectares)
1.1	Upper Yarrowee	Yarrowee	Upper	6,406
1.2	Winter	Yarrowee	Mid	10,880
1.3	Canadian/Buninyong	Yarrowee	Mid	6,846
1.4	Dog Trap/Ross	Yarrowee	Mid	9,727
1.5	Lower Yarrowee	Yarrowee	Lower	13,194
1.6	Williamsons	Yarrowee	Lower	10,666
2.1	Upper Leigh	Leigh	Upper	20,851
2.2	Lower Leigh	Leigh	Lower	9,898
3.1	Warrambine	Barwon	Mid	29,598
3.2	Native Hut	Barwon	Mid	21,046
3.3	Bruces	Barwon	Mid	8,432
3.4	Mia Mia	Murdeduke	Upper	10,653

Figure 2-1 Sub-catchment management areas

2.4. Natural Resource Management

Land, water and other natural resources within the LCG area are managed by a range of government agencies, non-government organisations, community groups, business and industry groups and private landholders. The key agencies, groups and individuals involved in natural resource management within the LCG area are:

- Ballarat and District Aboriginal Cooperative
- Ballarat Environment Network
- Barwon Water
- Central Highlands Water
- City of Ballarat
- Colac Otway and Surf Coast (small sections of the southern area of the Leigh Catchment Group area)
- Corangamite Catchment Management Authority
- Country Fire Authority
- Department of Planning and Community Development (including Aboriginal Affairs Victoria)
- Department of Primary Industries
- Department of Sustainability and Environment
- Golden Plains Shire
- Greening Australia
- Heritage Victoria
- Landcare and environmental groups (see below for list of groups within LCG area)
- Moorabool Shire Council
- Parks Victoria
- Private landholders and land managers
- Seeding Victoria
- Southern Rural Water
- VicRoads
- VicTrack
- Wathaurong community

There are currently nine Landcare/environment groups with areas of interest that occur within the LCG area. The urban and semi-urban area covered by the LINCS (Linear Network of Community Spaces) program managed by the City of Ballarat is also within the LCG area. The groups, and the sub-catchments covered by their area of activity, are listed in Table 2-3. Landcare group boundaries are shown in Figure 2-2.

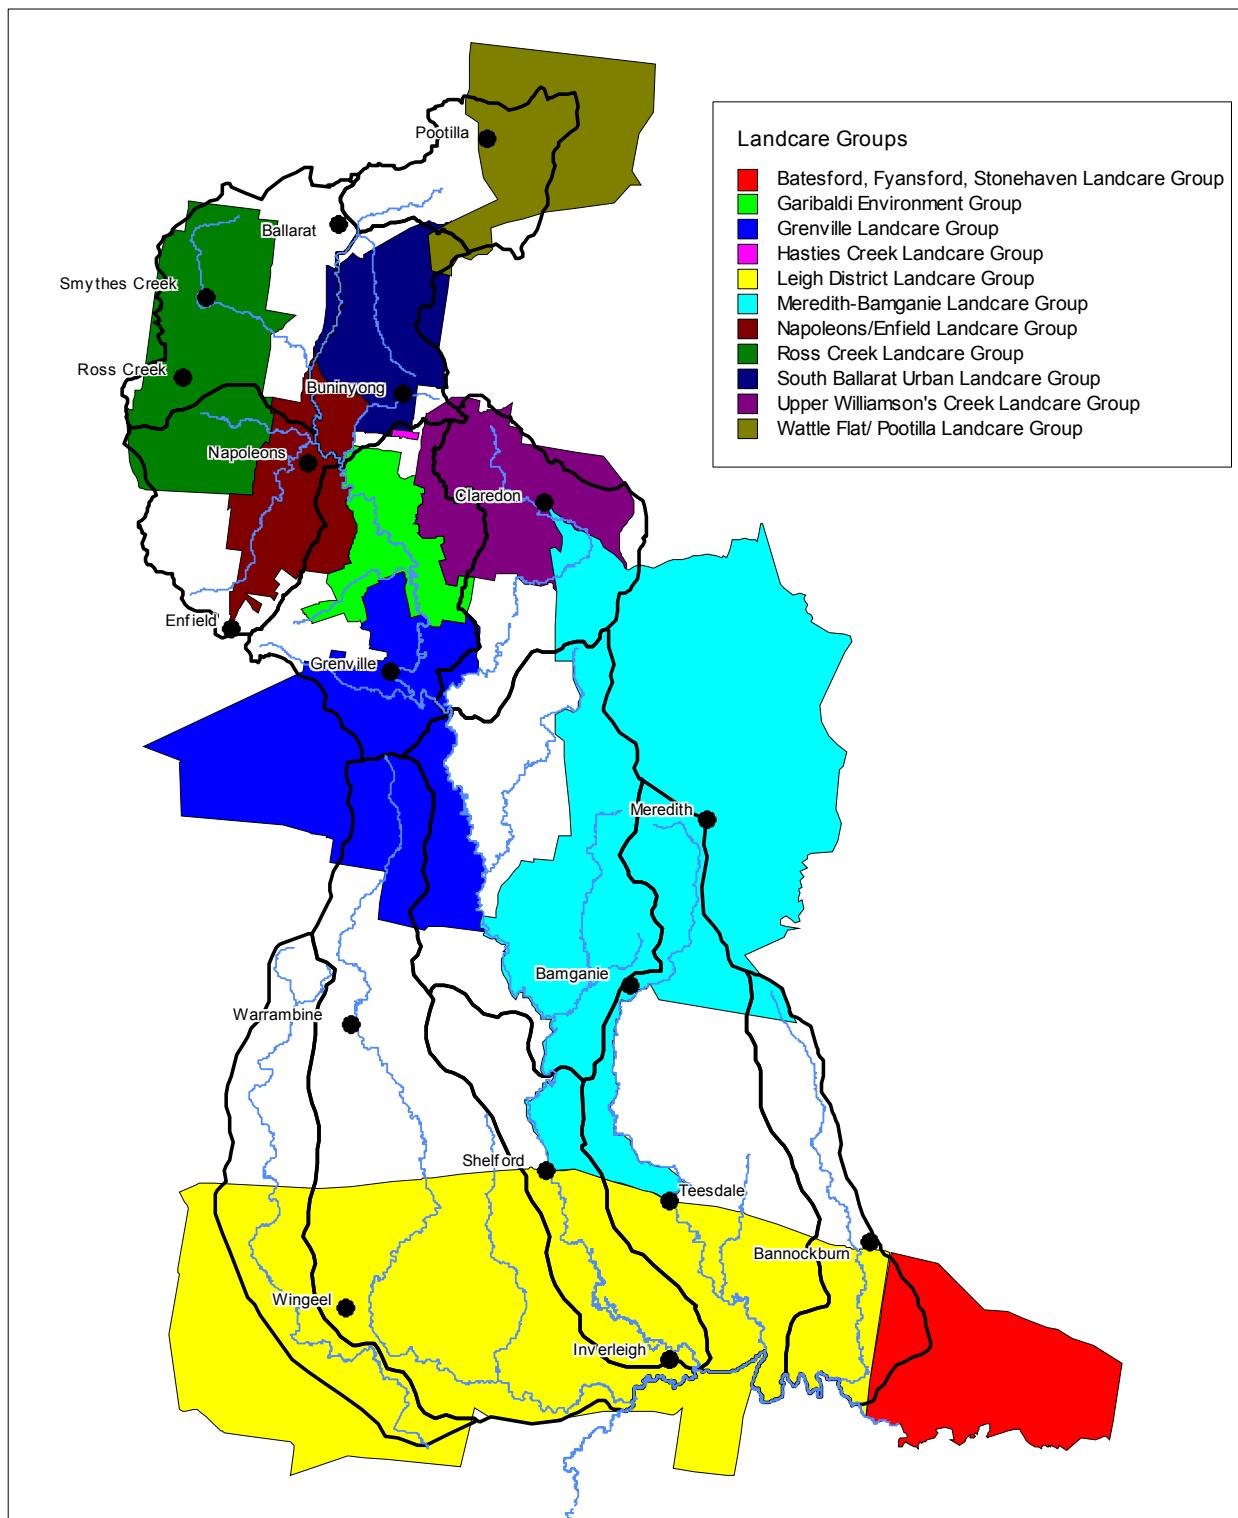

Table 2-3 Landcare/environment groups associated with the Leigh Catchment Group area

Landcare Group	Approx. area (ha) within LCG	Proportion of LCG area (%)	Sub-catchments covered by Landcare group
Bamganie-Meredith Landcare Group	20,340	13	Upper Leigh (50%) Native Hut (30%) Williamsons (10%) Lower Leigh (10%)
Garibaldi Environment Group	4,000	3	Lower Yarrowee (95%) Williamsons (<5%)
Grenville Landcare Group	10,400	7	Lower Yarrowee (40%) Warrambine (30%) Upper Leigh (25%)
Leigh Districts Landcare Group	36,370	23	Warrambine (45%) Native Hut (20%) Lower Leigh (15%) Mia Mia (15%) Bruces (11%)
Napoleons-Enfield Landcare Group	5,730	4	Dog Trap/Ross (60%) Lower Yarrowee (20%)

Landcare Group	Approx. area (ha) within LCG	Proportion of LCG area (%)	Sub-catchments covered by Landcare group
			Canadian/Buninyong (15%) Winter (10%)
Ross Creek Landcare Group	9,370	6	Winter (65%) Dog Trap/Ross (35%)
South Ballarat Urban Landcare Group	5,400	3	Canadian/Buninyong
Upper Williamson's Creek Landcare Group	7,700	5	Williamsons (80%) Lower Yarrowee (20%) Canadian/Buninyong (<5%)
Wattle Flat/Pootilla Landcare Group	3,370	2	Upper Yarrowee

Figure 2-2 Landcare group boundaries

Data source: CCMA dataset

3. Catchment Assets and Threats

3.1. Assets

A wide range of natural resource and environmental values occur within the LCG area. An overview of the key assets located within the LCG area is provided in Table 3-1. A description of land use and the key environmental assets is provided in Tables 3-2 — 3-6. A profile of natural resource assets for each of the 12 LCG sub-catchments is provided in Section 6.

The following environmental values/assets of the LCG area are shown in Figures 3-1 — 3-10.

- Figure 3-1 Distribution of remnant native vegetation classified by Bioregional Conservation Status (see Appendix 4 for Bioregional Conservation Status definitions).
- Figure 3-2 Broad distribution of rare and/or threatened fauna. A list of threatened fauna for each sub-catchment is provided in Section 6.
- Figure 3-3 Distribution and quantity of Atlas of Victorian Wildlife records.
- Figure 3-4 Broad distribution of rare and/or threatened flora. A list of threatened flora for each sub-catchment is provided in Section 6.
- Figure 3-5 Distribution and quantity of Flora Information System records.
- Figure 3-6 Major waterways and wetlands.
- Figure 3-7 Waterway environmental condition (Index of Stream Condition assessment).
- Figure 3-8 Land used for agriculture (grazing, cropping, dairy), horticulture or forestry.
- Figure 3-9 Roadside conservation status (RCAC roadside assessment rating).
- Figure 3-10 Aboriginal cultural heritage place sites.

Table 3-1 Summary of natural resource assets within the Leigh Catchment Group area

Asset	Description and significance	State and regional priorities
Native vegetation communities and flora	<ul style="list-style-type: none">• 932 native flora species.• 77 rare or threatened native flora species.• 19,000 hectares of remnant native vegetation.• 23 native vegetation communities.• 21 threatened vegetation communities.• Approximately 250 mapped roadsides supporting medium to very high conservation significance native vegetation (see Appendix 1 for list of roads).	<ul style="list-style-type: none">• Victoria's Biodiversity Strategy (DNRE 1997a) lists general priorities for each bioregion across the state.• Corangamite Native Vegetation Plan (CCMA 2005) priorities include:<ul style="list-style-type: none">• Priority Ecological Vegetation Class (EVC) for protection• Priority EVCs for revegetation.• Linear reserves• Scattered trees• Threatened flora• Threatened fauna.• Flora listed under FFG Act and EPBC Act.• DSE Biosites.• DSE and Parks Victoria management plans identify significant conservation areas through zoning and identify priority management strategies for individual Parks or reserves.• Areas covered by Local Government planning scheme Vegetation Protection Overlays.• Significant roadsides identified in Roadside Management Plans and/or significant identified from roadside vegetation surveys.

Asset	Description and significance	State and regional priorities
Native fauna	<ul style="list-style-type: none"> 322 native fauna species. 56 rare and/or threatened native fauna species. 	<ul style="list-style-type: none"> Victoria's Biodiversity Strategy (DNRE 1997a) lists general priorities for each bioregion across the state. Fauna listed under FFG Act and EPBC Act. Victorian Rare and/or threatened fauna (DSE 2005a, 2007). DSE Biosites. Koala habitat and management areas (Schlagloth <i>et al.</i> 2006)
Waterway and wetland systems	<ul style="list-style-type: none"> 500 kilometres of major rivers and streams (Yarrowee/Leigh River 108 kilometres). 140 wetlands. Nationally Significant wetlands - Lake Wendouree. Regionally significant (environmental) waterway - Leigh River (Reach B12) (CCMA 2004a). 	<ul style="list-style-type: none"> CCMA River Health Strategy (CCMA 2004a) priority waterway – Leigh River (Williamsons Creek confluence to Barwon River section) CCMA Wetland Strategy (CCMA 2006a) key wetlands - White Swan Reservoir, Lake Wendouree, Gong Gong Reservoir, Kirk Reservoir, Pincott Reservoir, Bingley Swamp. Yarrowee/Leigh/Canadian/Buninyong Masterplans
Land	<ul style="list-style-type: none"> 126,000 hectares of agricultural and horticultural land. 4,800 hectares of semi-urban land use. 6,000 hectares of urban land use. 	<ul style="list-style-type: none"> Corangamite Salinity Action Plan (Nicholson <i>et al.</i> 2006) priority areas (none located within LCG area). Corangamite Soil Health Strategy (Clarkson 2007) investment priorities.
Cultural heritage	<ul style="list-style-type: none"> Aboriginal and non-aboriginal cultural heritage sites and objects. 	Sites and areas listed with AAV, Heritage Victoria, National Trust and other local heritage databases/archives.

Table 3-2 Leigh Catchment Features and Land Use Summary

Feature	Area (ha)	% of LCG area
LCG catchment area	158,197	na
Public land	16,150	10
Private land	142,046	90
Land use:		
Agriculture/Horticulture	126,047	80
Conservation	5,738	4
Forestry	7,820	5
Mining	545	<1
Semi-urban	4,832	3
Urban	5,980	4

3.2. Threats

Threatening processes that potentially affect the condition of natural resource assets of the LCG area were identified and are listed in Table 3-7. A profile of threatening processes within the LCG area is provided in Table 3-8.

The following threatening processes are shown in Figures 3-11 — 3-13.

Figure 3-11 Mapped primary (natural) and secondary (induced) salinity sites.

Figure 3-12 Mapped gully, sheet and rill erosion

Figure 3-13 Declared noxious weeds (CaLP Act)

Table 3-7 Threatening processes within the Leigh Catchment Group area

Threat	Assets potentially affected by the threat	Relevant priorities identified in state/regional/local strategies and plans
Native vegetation loss and degradation: Threatening processes include: <ul style="list-style-type: none"> • Clearing • Altered grazing regimes • Altered fire regimes • Altered hydrological regimes • Land use change 	Flora, fauna, soil condition, water quality, cultural heritage	<ul style="list-style-type: none"> • Victorias Biodiversity Strategy (DNRE 1997a): Reversal, across the entire landscape, of the long-term decline in the extent and quality of native vegetation • State Government Native Vegetation Framework (DNRE 2002a). Aims to achieve 'Net Gain' in native vegetation quantity and quality. Defers regional priority setting to Native Vegetation Plans. • Corangamite Native Vegetation Plan (CCMA 2005). Lists priority EVCs for protection and restoration. • Areas covered by Local Government planning scheme Vegetation Protection Overlays.
Pest plants	Flora, fauna, agricultural land	<ul style="list-style-type: none"> • Corangamite region weeds listed under CaLP Act (See Appendix 2 for list of declared noxious weeds for the Corangamite area) (DPI 2008). • Corangamite Weed Action Plan (CCMA 2000c) describes priority weeds.
Pest animals	Flora, fauna, agricultural land	<ul style="list-style-type: none"> • Corangamite Rabbit Action Plan (CCMA 2000a) defines priority areas for Rabbit management.
Soil health decline including: <ul style="list-style-type: none"> • Salinity • Erosion • Acidification • Structure decline • Waterlogging 	Agricultural land, flora, fauna, water quality, cultural heritage	<ul style="list-style-type: none"> • Corangamite Salinity Action Plan (Nicholson <i>et al.</i> 2006) priority areas (no priority areas identified within the LCG area). • Corangamite Soil Health Strategy (Clarkson 2007) investment priorities and including gully, tunnel, sheet and rill erosion in the Leigh landscape zone.
Waterway and wetland health decline. Threatening processes include: <ul style="list-style-type: none"> • Salinisation • Sedimentation • Excessive nutrients • Altered flow regimes • Aquatic and riparian vegetation and habitat loss 	Water quality, riparian and aquatic flora and fauna, cultural heritage	<ul style="list-style-type: none"> • CCMA River Health Strategy (CCMA 2004a) priority waterways - Lower Leigh River. • Corangamite Regional Wetland Strategy (CCMA 2006a). No specific priority wetlands listed. Lists the development and implementation of a wetland prioritisation process for regional investment as a priority. Also identifies the need to develop wetland local action plans. • Leigh River catchment classified as high implementation priority within an agricultural land program in the Corangamite Nutrient Management Strategy (CCMA 2000b). • 2004 ISC assessment classified Barwon River basin condition as very poor (DSE 2005b)
Climate change - reduced water availability (reduced rainfall and increased evaporation) and temperature increases	Flora, fauna, water quantity and quality, agricultural land	<ul style="list-style-type: none"> • No specific regional or state strategies/plans with NRM focus. Various climate change based issues incorporated in other NRM plans and strategies.
Urbanisation and land use change	Flora, fauna, water quality,	<ul style="list-style-type: none"> • Blueprint Ballarat (City of Ballarat 2004) contains

Threat	Assets potentially affected by the threat	Relevant priorities identified in state/regional/local strategies and plans
	cultural heritage, agricultural land	<p>strategic direction for residential and commercial development within the City of Ballarat.</p> <ul style="list-style-type: none"> • Local Government planning scheme zoning and planning overlays (ie. VPO, ESO, SLO EMO) • Yarrowee/Canadian/Buninyong Creek Masterplans

Table 3-8 Threatening process profile for the LCG area

Threat type	Quantity	% of LCG area
Salinity ¹		
Number of mapped primary salinity sites	46	-
Number of mapped secondary salinity sites	220	-
Area of mapped primary salinity sites (ha)	150	0.1
Area of mapped secondary salinity sites (ha)	1,013	0.6
Erosion ²		
Length of mapped gully erosion (km)	125	na
Area of mapped sheet/rill erosion (ha)	885	0.6
Approximate area of native vegetation loss (ha) ³ (may include some areas supporting highly depleted native vegetation)	138,000	88%
Pest plants (CaLP CCMA declared noxious weeds*) ⁴ . (See Appendix 2 for the list of declared noxious weeds for the Corangamite area).		
Number of Regionally Prohibited species	0	-
Number of Regionally Controlled species	24	-
Number of Restricted species	23	-
Total number of declared noxious weed species	47	-

⁴ Flora Information System (DSE 2004b)

Table 3-9 Declared weed definitions (DPI 2008)

Regionally Prohibited Weeds	Regionally Prohibited weeds are not widely distributed in a Region but are capable of spreading further. It is reasonable to expect that they can be eradicated from a Region and they must be managed with that goal. Land owners must take all reasonable steps to eradicate Regionally Prohibited weeds on their land.
Regionally Controlled Weeds	These weeds are usually widespread and are considered important in a particular Region. To prevent their spread, continuing control measures are required. Land owners have the responsibility to take all reasonable steps to prevent the growth and spread of Regionally controlled weeds on their land.
Restricted Weeds	Includes plants that pose an unacceptable risk of spreading in the State or to other parts of Australia if they were to be sold or traded in Victoria, and are a serious threat to another State or Territory of Australia. Trade in these weeds and their propagules, either as plants, seeds or contaminants in other materials is prohibited

4. LCG Natural Resource Management activities

Approximately 200 land owners/managers (individuals, landcare groups, community groups and committees) have received funding assistance to undertake over 250 NRM projects and activities (between 1997-2007) within the LCG area. These projects have addressed a range of environmental issues including remnant vegetation protection and enhancement, revegetation of degraded landscapes, salinity control, erosion control, wetland and waterway protection and restoration, habitat corridors and pest plant control.

A breakdown of on-ground NRM projects undertaken by the LCG is shown in Table 4-1 and the location of project sites is shown in Figure 4-1. The summary does not include other NRM projects undertaken by landholders and landcare groups independently of the LCG or projects coordinated by the LCG but not funded by the Group. Table 4-2 lists the total amount of land, length of fencing and number of plants involved in LCG projects over the past ten years.

Over 18 NRM programs/projects have been developed and funded by the LCG. Over \$1.8 million of NRM funding has been managed by LCG for on-ground and related NRM activities within the LCG area. LCG NRM programs and projects are summarised in Table 4-3.

Alongside the development and coordination of on-ground works, the LCG Landcare officers (Andrea Mason and Jenny Sedgwick) have provided support to Landcare and other community groups within the LCG area and have coordinated and implemented numerous community based activities including training courses, workshops/seminars/field days, event displays, school programs, and media events. A wide range of NRM information resources have been developed and promoted through brochures, newsletters, electronic mailing, the internet and the media.

Table 4-1 Total number of NRM projects undertaken through the LCG: 1997–2007

Activity type	No of projects
Remnant vegetation protection/enhancement	22
Revegetation	56
Salinity control	6
Erosion control	2
Waterway rehabilitation	71
Wetland protection/enhancement	4
Corridor establishment	71
Pest plant control	16
Escarpment management	3
Total	251

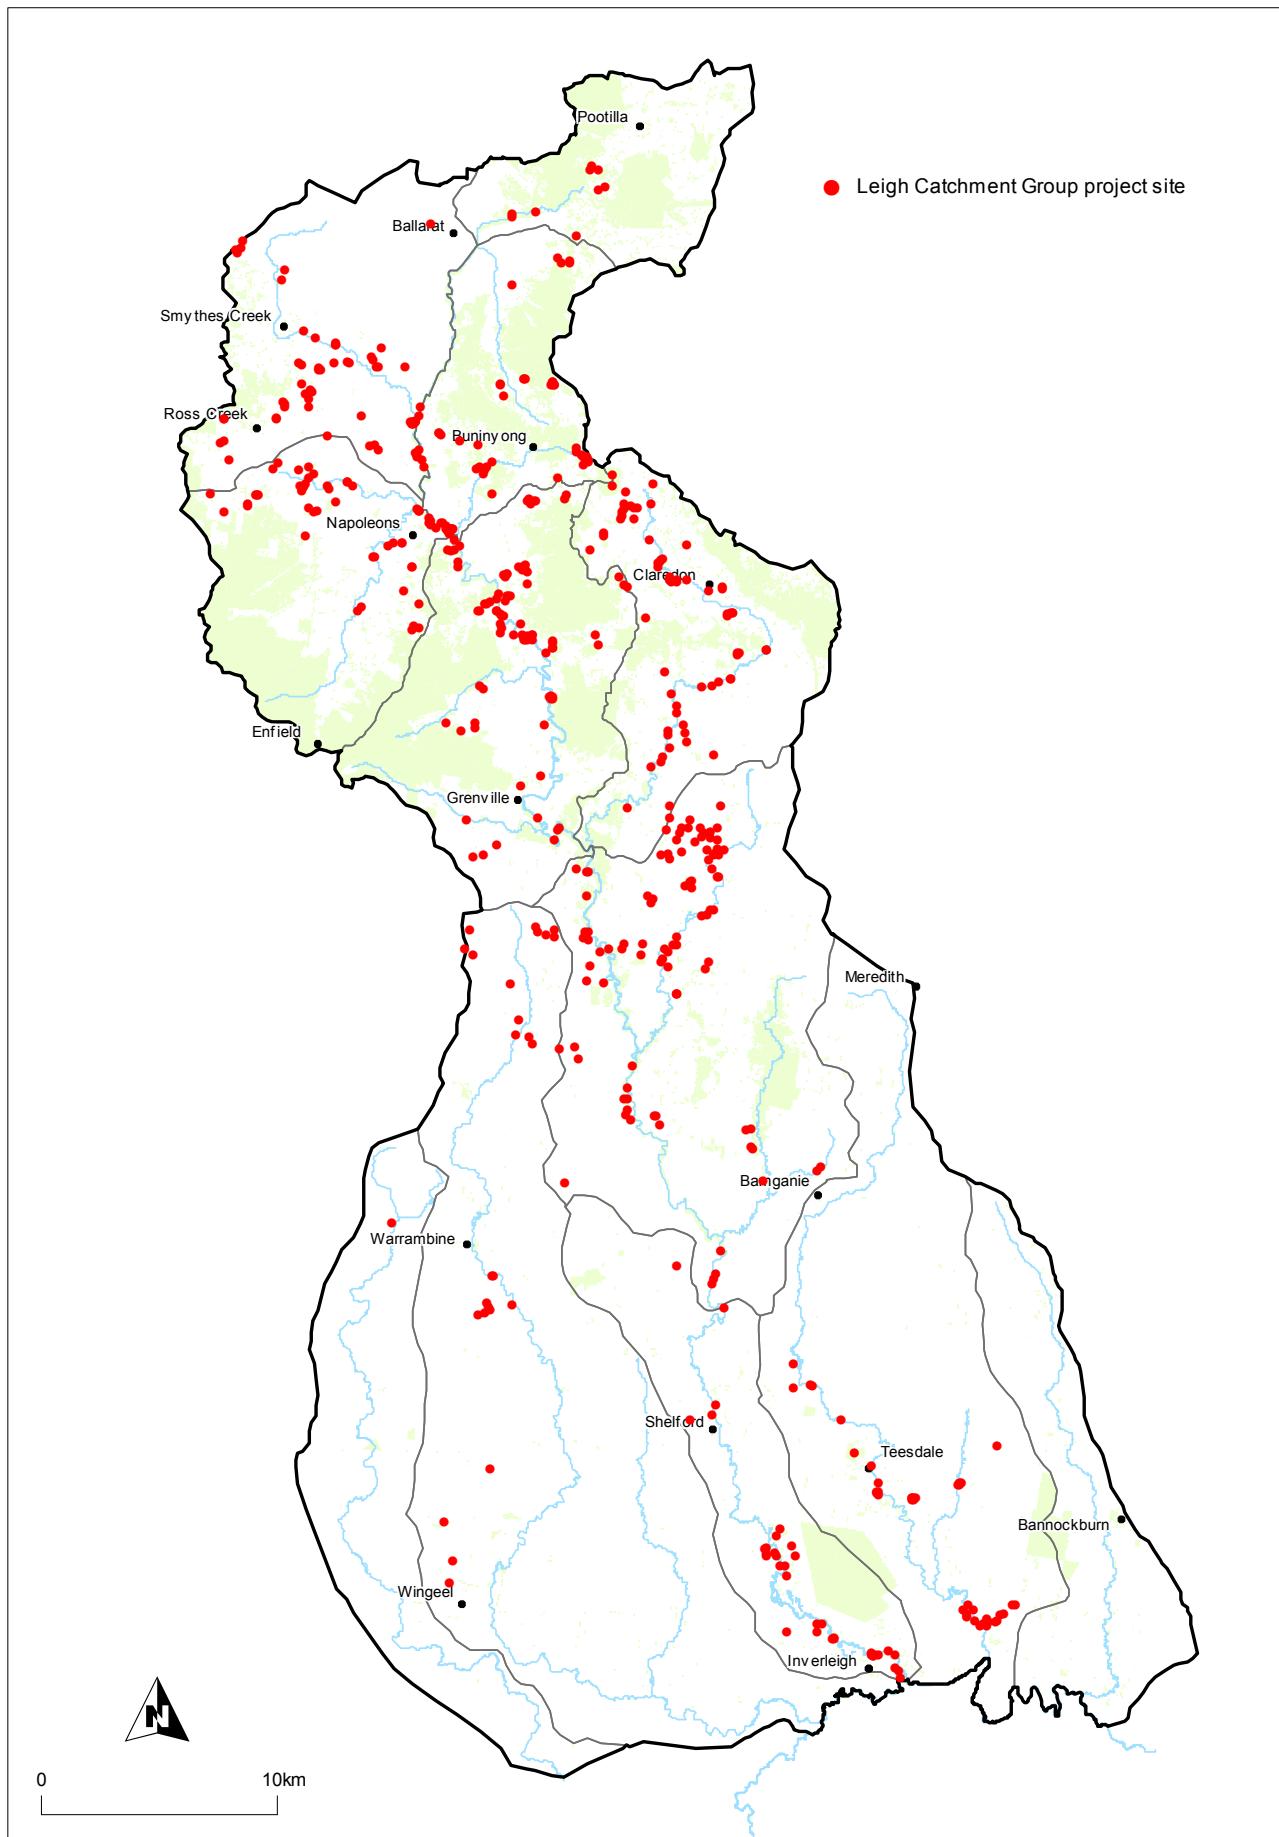

Table 4-2 Summary of NRM works undertaken through the LCG: 1997–2007

NRM works	Amount
Total land area (ha) subject to NRM works	529
Total length (km) of fencing constructed for NRM works	130
Number of plants	397,452
Length of stream protected (km)	23
Area of weed control (ha)	61
Area revegetated – terrestrial (ha)	190
Area revegetated – riparian/wetland (ha)	184
Area of remnant vegetation protected (ha)	94
Area of wetland protected (ha)	67

5. Catchment and Sub-catchment Profiles and Actions

The following section summarises catchment asset, threat and NRM activity information for each sub-catchment area. The information presented in the profiles has been extracted from existing databases and spatial datasets. The profiles are not an exhaustive list of features within the sub-catchments and may contain inaccuracies.

Sub-catchment profile data sources:

Native vegetation	Ecological Vegetation Class EVC_BCS100 GIS dataset layer (DSE2002)
Native Fauna	Atlas of Victorian Wildlife database (DSE 2004a)
Native Flora	Flora Information System (DSE 2004b)
Salinity	Corangamite salinity mapping GIS data layer (CCMA 2008)
Erosion	Corangamite erosion mapping GIS data layers (CCMA 2008)
Introduced flora	Flora Information System (DSE 2004b)
NRM projects	Leigh Catchment Group Project Database and the Catchment Activity Management System (CAMS) Database

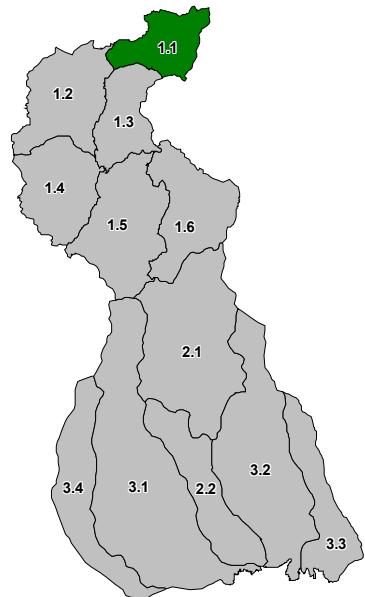

Sub-catchment 1.1 — Upper Yarrowee

Sub-catchment Features and Land Use Summary

Feature	Area (ha)	% of sub-catchment area
Sub-catchment area	6,406	4*
Public land	1,735	27
Private land	4,671	73
Land use:

6. Actions

The actions that aim to protect or enhance the identified assets, and reduce the impact of the identified threats within the LCG area, are grouped under the following themes:

- Climate change adaptation and mitigation.
- Community support, engagement and capacity building.
- Cultural heritage protection and management.
- Pest plant and animal control and management.
- Protection, enhancement and restoration of biodiversity.
- Salinity and soil health management.
- Sustainable agricultural practices.
- Waterway and wetland protection and enhancement.

- This section presents priority actions for works and activities. Table 6-1 lists an action reference number, the type of action, priorities or targets for the implementation of the action, methods or techniques that may be employed to implement the action and a list of key stakeholders or partners that may assist or support the delivery of the action.

Table 6-1 Actions for the Leigh Catchment Group Area

Ref.	Action	Priorities/location	Methods	Stakeholders/Partners
1 Climate change mitigation and adaptation				
1.1	Investigate and develop opportunities to establish carbon offset/trading programs for the LCG area.	<ul style="list-style-type: none">• Auditing programs• Carbon sequestration programs	<ul style="list-style-type: none">• Arrange information sessions, workshops and meetings• Establish trial sites	<ul style="list-style-type: none">• Carbon offset/trading groups
1.2	Support and promote carbon emission reduction programs.	<ul style="list-style-type: none">• Carbon emission reduction programs for agriculture• Household emission reduction education programs	<ul style="list-style-type: none">• Arrange meetings between LCG officers/executive and program coordinators• Provide opportunities for presentations and information sessions• Publicise programs in LCG media material	<ul style="list-style-type: none">• DPI/DSE• BREAZE• LAL• CCMA• Sustainability Victoria• Landcare/community groups
1.3	Investigate impacts of climate change on catchment assets and NRM management techniques.	<ul style="list-style-type: none">• Waterway and wetland change• Adaptation of revegetation methods• Weather events• Reduced water availability	<ul style="list-style-type: none">• Develop and/or support projects investigating the impact of climate change on natural resources in the Corangamite region.	<ul style="list-style-type: none">• Tertiary institutions and research groups• DPI/DSE• CCMA

Ref.	Action	Priorities/location	Methods	Stakeholders/Partners
1.4	Develop carbon neutral policy for the Leigh Catchment Group.	<ul style="list-style-type: none"> LCG activities 	<ul style="list-style-type: none"> Undertake carbon audit for LCG activities. Set emissions targets Identify actions for reducing emissions Reduce waste-recycle paper, use recycled paper for publishing 	<ul style="list-style-type: none"> Sustainability Victoria
2	Community support, engagement and capacity building			
2.1	Provide support to LCG Landcare groups.	<ul style="list-style-type: none"> LCG member Landcare groups Related community environmental groups 	<ul style="list-style-type: none"> Project management NRM advice and information Funding opportunities Networking Site assessments Implementation of Landcare support strategy processes and recommendations Publicity Meetings 	<ul style="list-style-type: none"> Landcare/community groups CCMA
2.2	Promote landholder involvement with Landcare groups.	<ul style="list-style-type: none"> Private landholders within the LCG area 	<ul style="list-style-type: none"> Field days Event displays Promotional material Media releases 	<ul style="list-style-type: none"> Landcare/community groups CCMA DSE/DPI Greening Australia
2.3	Promote and support voluntary landholder agreements (eg. 8.3	Protect, restore and/or enhance wetlands and associated native vegetation and fauna habitat.	<ul style="list-style-type: none"> Internationally, Nationally or Regionally significant wetlands. Wetlands supporting rare and/or threatened flora or fauna Locally significant sites identified through Local Action Plans. Farm dams. 	<ul style="list-style-type: none"> Remove artificial hydrological regimes that degrade wetland condition Fencing for site management Cease clearing and timber removal Ecological burning Controlled grazing for biomass and weed control Control pest plants and animals Restore degraded or missing vegetation components. Establish artificial fauna habitat Identify landholders of priority waterway sites and provide information and promote LCG programs. Wetland habitat improvement earthworks 	<ul style="list-style-type: none"> Landholders Landcare/community groups CCMA DSE Greening Australia Local government Seeding Victoria Schools CFA
8.4	Restore native vegetation adjacent to wetlands to augment and buffer biodiversity values.	<ul style="list-style-type: none"> Internationally, Nationally or Regionally significant wetlands. Wetlands supporting rare and/or threatened flora or fauna Locally significant sites identified through Local Action Plans. Farm dams. 	<ul style="list-style-type: none"> Standard revegetation methods to establish a range of lifeforms/strata that match the relevant local EVC(s). Incorporate habitat features for a range of wildlife including aquatic fauna. 	<ul style="list-style-type: none"> Landholders Landcare/community groups CCMA DSE Greening Australia Local government Seeding Victoria Schools
8.5	Promote and encourage involvement in NRM agency river and wetland restoration and improvement programs.	<ul style="list-style-type: none"> Private land managers and landholders 	<ul style="list-style-type: none"> Provide information to landholders and land managers. Facilitate and/or promote workshops, information sessions and presentations. 	<ul style="list-style-type: none"> CCMA DSE Greening Australia DPI Schools

7. Implementation

7.1. Local Action Plans

The implementation of actions listed in Section 6 would be facilitated by local NRM action plans developed by Landcare or other community groups. These plans would incorporate the knowledge, interests and priorities of local landholders and land managers. The LCG CAP provides background information and context for the development of the local action plans and highlights areas or issues for potential NRM projects that could be undertaken through a Landcare or other community group.

A template is provided in Appendix 3 to assist community based groups to develop a local NRM action plan.

7.2. Leigh Catchment Group structure and administration

The Leigh Catchment Board consists of nine elected Landcare Members. There are two Landcare Coordinator positions (currently equivalent to 1.8 FTE positions). The coordinators are responsible for managing projects and activities undertaken through the LCG and provide support to the Landcare Group members.

The key organisational features and processes that will support the LCG in delivering successful NRM initiatives are outlined in Table 7-1.

Table 7-1 Key LCG organisational requirements and processes

Action/recommendation	Notes/supporting information
Continue LCG Landcare officer position at a minimum 1 full time equivalent	<ul style="list-style-type: none">High priority.Key role for the development of funding applications and coordination with regional, state and national NRM agencies.A critical aspect of the successful administration and management of the LCG.Important role for providing support to Landcare groups within the LCG area.Key role for project support, tracking, mapping, reporting and quality control.
Develop LCG Business Plan	<ul style="list-style-type: none">Review constitution.Production of Marketing brochure to forge sponsorship links with corporate sponsors and local businesses.
Develop a set of on ground project guidelines.	<ul style="list-style-type: none">Structure to best NRM management practices to ensure project quality control for funding from new sources.
Strengthen partnerships with agencies.	<ul style="list-style-type: none">Ensure regular communication with local government including local councillors.Continue links with DPI, DSE, CCMA and water authorities to exchange information and implement relevant departmental programs within the LCG.
Develop partnerships with adjoining landcare networks	<ul style="list-style-type: none">Continue to participate in the Corangamite Landcare Coordinators Working Group activities.
Maintain communication processes within the LCG	<ul style="list-style-type: none">Production and distribution of 'Leighway' newsletter and E news.Continue regular meetings of the LCG board and communication with Landcare group representatives.
Provide appropriate financial remuneration to executive members (eg. Secretary and treasurer)	<ul style="list-style-type: none">Cover expenses and a proportion of the provided labour
Continue to maintain LCG office in Buninyong.	<ul style="list-style-type: none">Investigate and develop proposals for alternative office locations including the potential Royal Park redevelopment.
Maintain necessary technical equipment and office resources	<ul style="list-style-type: none">Maintain and upgrade computing hardware and software as required.

7.3. Support and Partnerships

A range of agencies and organisations may provide assistance with the delivery of actions listed in this CAP. Partnerships with one or more of the groups listed below can be formed to deliver a range of NRM outcomes across a variety of land use types.

Key agencies/organisations	Roles and responsibilities
Ballarat Environment Network	Biodiversity management, NRM knowledge and information, coordination of NRM projects
Barwon Water	Water management
Central Highlands Water	Water management
Corangamite Catchment Management Authority	Funding, native vegetation management, waterway and wetland management, NRM information management, volunteer group support. Carbon trading opportunities
Department of Sustainability and Environment	Development and implementation of sustainability and biodiversity policies, programs and priorities.
Department of Primary Industries	Development and implementation of sustainability and biodiversity policies, programs and priorities. Carbon trading opportunities
Indigenous organisations and communities	Cultural knowledge and surveys, management of culturally significant sites and values, land management
Landcare groups and other community based NRM groups	Implementation of NRM projects including on-ground works, community capacity building and networking, development of local action plans
Local businesses and industry	NRM related technological services and products. NRM management expertise and services. Financial support/sponsorship of NRM projects.
Landcare Australia Ltd	Carbon trading opportunities
Local Government: City of Ballarat Moorabool Shire Council Golden Plains Shire Colac Otway Shire Council Surf Coast Shire Council	Public land management (including relevant roadsides), strategic land use planning, sustainability planning and development, statutory planning, policy development, storm water management
Parks Victoria	Management of biodiversity and other natural resource values on Parks and reserves
VicRoads	Management of biodiversity and other natural values on roadsides. Control of pest plants and animals
VicTrack	Management of biodiversity and other natural values on rail reserves. Control of pest plants and animals
Greening Australia	Development and implementation of sustainability and biodiversity programs. NRM knowledge and information, coordination of NRM projects. Community Education.
Seeding Victoria	Coordination of indigenous seed supply. Community education programs.

8. Monitoring and Evaluation

A range of catchment scale monitoring frameworks and processes are being implemented by DSE, DPI, CCMA and other agencies to report on progress towards improved NRM within the Corangamite area. The Corangamite Regional Catchment Strategy outlines a monitoring and evaluation framework that has been developed to measure progress towards achievement of targets within the Corangamite Catchment. Feedback and reporting from state and regional based monitoring programs back to the Leigh Catchment Group will provide the opportunity to assess the outcomes of NRM activities undertaken by the Group.

An effective monitoring and assessment process requires the measurement of inputs (eg. number of trees planted, length of fencing, number of workshops/field days) and outputs (eg. changes in native vegetation extent and quality, changes in extent and severity of erosion, community participation levels and knowledge) need to be measured.

The LCG currently records and monitors inputs (including costs) through the use of the Leigh Catchment Group Project Database (custom designed relational database). The Group also submits information from the database into CAMS (Catchment Activity Management System). The CAMS database is a data management and reporting system developed by State Government for regional DSE, DPI and CMA staff. LCG officers have recently worked with the CCMA to map on-ground NRM projects undertaken within the LCG area for entry into CAMS.

The key processes required for monitoring and evaluating NRM activities within the LCG are listed in Table 8-1.

Table 8-1 NRM monitoring and evaluation framework

Task/process	Timeline	Responsibility
Enter NRM project information into LCG Project Database.	At commencement of all projects and update as required during active period of project	LCG
Map LCG NRM projects (where applicable) to complement project information held in the LCG Project Database	At completion of all projects (where project has a spatial component)	LCG
Transfer of data to CAMS	Specified by CCMA	LCG/CCMA
Submit Landcare reports to CCMA	Specified by CCMA	LCG
Measure and report on indicators of catchment health (delivered by key NRM agencies, CCMA, DSE, DPI) to assess progress towards meeting NRM targets.	Specified by delivery agency	CCMA/DSE/DPI
Assess community participation in NRM within the Leigh Catchment and evaluate community perceptions of the Leigh Catchment Group.	Biannually	CCMA/LCG
Undertake targeted review and assessment of restoration and mitigation techniques used for LCG NRM projects	Develop and undertake project by 2010	LCG/CCMA/DPI
Develop targeted experimental research projects to determine changes and effects in relation NRM works within the catchment	To be determined	LCG/CCMA/DPI/DSE/tertiary institutions

Appendix 1 Significant roadsides in the LCG area

The following table lists roads that support areas of medium, high or very high conservation significance (RCAC conservation significant rating) remnant native vegetation. The list only includes roads that have been systematically assessed using the RCAC roadside assessment method. A large area of the Golden Plains Shire within the LCG area is yet to be assessed using this method. The highest recorded significance category for each roadside is shown.

Road name	Sub-catchment

Appendix 2 Declared noxious weeds of the Corangamite CMA region

Source: Department of Primary Industries (DPI 2008)

Scientific name	Common name	Category
<i>Acroptilon repens</i>	Hardheads/Russian Knapweed	Regionally prohibited
<i>Ailanthus altissima</i>	Tree of Heaven	Restricted
<i>Allium triquetrum</i>	Angled Onion	Restricted
<i>Allium vineale</i>	Wild Garlic	Restricted
<i>Alternanthera pungens</i>	Khaki Weed	Restricted
<i>Amsinckia spp.</i>	Amsinckia	Regionally prohibited
<i>Asphodelus fistulosus</i>	Onion Weed	Restricted
<i>Calicotome spinosa</i>	Spiny Broom	Regionally controlled
<i>Cardaria draba</i>	Hoary Cress	Regionally controlled
<i>Carduus tenuiflorus</i>	Slender/Shore Thistle	Restricted
<i>Carthamus lanatus</i>	Saffron thistle	Restricted
<i>Cenchrus longispinus</i>	Spiny Burr Grass/Gentle Annie	Restricted
<i>Centaurea calcitrapa</i>	Star Thistle	Restricted
<i>Centaurea solstitialis</i>	St Barnaby's thistle	Regionally prohibited
<i>Cestrum parqui</i>	Chilean Cestrum	Restricted
<i>Chondrilla juncea</i>	Skeleton Weed	Restricted
<i>Chrysanthemoides monilifera</i>	Boneseed/Bitou Bush	Regionally controlled
<i>Cirsium arvense</i>	Californian/Perennial Thistle	Regionally controlled
<i>Cirsium vulgare</i>	Spear Thistle	Restricted
<i>Conium maculatum</i>	Hemlock	Regionally controlled
<i>Convolvulus arvensis</i>	Bindweed	Restricted
<i>Crataegus monogyna</i>	Hawthorn	Restricted
<i>Cuscuta spp.</i>	Dodder	Restricted
<i>Cynara cardunculus</i>	Artichoke Thistle	Regionally controlled
<i>Cytisus scoparius</i>	English Broom	Regionally controlled
<i>Datura ferox</i>	Thorn Apple (long-spine)	Restricted
<i>Datura inoxia</i>	Thorn Apple (recurved)	Restricted
<i>Datura stramonium</i>	Thorn Apple (common)	Restricted
<i>Diplotaxis tenuifolia</i>	Sand Rocket/Sand Mustard	Restricted
<i>Dipsacus fullonum ssp. fullonum</i>	Wild Teasel	Restricted
<i>Dittrichia graveolens</i>	Stinkwort	Restricted
<i>Echium plantagineum</i>	Paterson's Curse	Regionally controlled
<i>Echium vulgare</i>	Viper's Bugloss	Regionally controlled
<i>Emex australis</i>	Spiny Emex	Restricted
<i>Eragrostis curvula</i>	African Lovegrass	Regionally controlled
<i>Foeniculum vulgare</i>	Fennel	Regionally controlled
<i>Genista linifolia</i>	Flax-leaved Broom	Regionally controlled
<i>Genista monspessulana</i>	Cape Broom	Regionally controlled
<i>Homeria flaccida (Moraea flaccida)</i>	Cape Tulip (one-leaf)	Regionally controlled
<i>Homeria miniata (Moraea miniata)</i>	Cape Tulip (two-leaf)	Regionally prohibited
<i>Hypericum androsaemum</i>	Tutsan	Restricted
<i>Hypericum perforatum</i>	St. John's Wort	Regionally controlled
<i>Hypericum tetrapterum</i>	St. Peter's Wort	Restricted
<i>Ibicella lutea</i>	Devil's Claw (yellow-flower)	Restricted
<i>Juncus acutus</i>	Spiny Rush	Restricted
<i>Lavandula stoechas</i>	Topped Lavender	Restricted
<i>Leucanthemum vulgare</i>	Ox-eye Daisy	Regionally controlled
<i>Lycium ferocissimum</i>	Boxthorn	Regionally controlled

Scientific name	Common name	Category
<i>Marrubium vulgare</i>	Horehound	Regionally controlled
<i>Melianthus comosus</i>	Tufted Honeyflower	Restricted
<i>Nassella trichotoma</i>	Serrated Tussock	Regionally controlled
<i>Onopordum acanthium</i>	Scotch/Heraldic Thistle	Regionally controlled
<i>Onopordum acaulon</i>	Stemless Thistle	Restricted
<i>Onopordum illyricum</i>	Illyrian Thistle	Restricted
<i>Opuntia monacantha</i> (<i>Opuntia vulgaris</i>)	Prickly Pear (drooping)	Restricted
<i>Opuntia robusta</i>	Wheel Cactus	Restricted
<i>Opuntia stricta</i>	Prickly Pear (erect)	Restricted
<i>Oxalis pes-caprae</i>	Soursob	Restricted
<i>Pennisetum macrourum</i>	African Feather Grass	Regionally prohibited
<i>Physalis viscosa</i>	Prairie Ground Cherry	Regionally controlled
<i>Picnonum acarna</i> (<i>Cirsium acarna</i>)	Soldier Thistle	Restricted
<i>Proboscidea louisianica</i>	Devil's Claw (purple-flower)	Restricted
<i>Reseda luteola</i>	Wild Mignonette	Restricted
<i>Rosa rubiginosa</i>	Sweet Briar	Regionally controlled
<i>Rubus fruticosus</i>	Blackberry	Regionally controlled
<i>Salpichroa organifolia</i>	Pampas Lily-of-the-Valley	Restricted
<i>Scolymus hispanicus</i>	Golden Thistle	Regionally controlled
<i>Senecio jacobaea</i>	Ragwort	Regionally controlled
<i>Senecio pterophorus</i>	African Daisy	Regionally prohibited
<i>Silybum marianum</i>	Variegated Thistle	Restricted
<i>Solanum elaeagnifolium</i>	Silverleaf Nightshade	Regionally controlled
<i>Solanum linnaeanum</i>	Apple of Sodom	Restricted
<i>Solanum rostratum</i>	Buffalo Burr	Restricted
<i>Tribulus terrestris</i>	Caltrop	Regionally controlled
<i>Ulex europaeus</i>	Furze/Gorse	Regionally controlled
<i>Verbascum thapsus</i>	Great Mullein	Restricted
<i>Watsonia meriana</i> var ' <i>Bulbillifera</i> '	Wild Watsonia	Regionally controlled
<i>Xanthium spinosum</i>	Bathurst Burr	Regionally controlled
<i>Xanthium strumarium</i>	Noogoora Burr/Californian Burr	Regionally prohibited

Appendix 3 Local Action Plan Template

Landcare Group Local Action Plan

Action plan timeframe:	Time period to which plan applies
Area covered by action plan:	Description of area to which plan applies
Action plan version:	Version number eg. 1-1 (allows tracking of updates and amendments)
Approval date:	Date of finalisation and approval by group/organisation members

PART 1

Insert appropriate sub-catchment/s information from Leigh Catchment Plan

- Sub-catchment map
- Sub catchment Features and Landuse Summary
- Environmental Asset Summary
- Threat Summary
- Activity summary (LCG projects 1997-2007)
- NRM activity summary (LCG projects 1997-2007)
- Appendix 4 Conservation status and weed category definitions
- Attach Section 6 Actions and Table 6-1 for cross referencing

PART 2

Identify what action(s) your landcare group intends to undertake from the Leigh Catchment Plan (Section 6 Actions) and apply them where you can to specific sites, or list as specific issues.

1.List of your priority SITES. Please complete and add sites as necessary.

Site 1: (add site name)
(Add description of site including location, site history, environmental features and values and previous natural resource management works),
Threat(s) (list threatening processes that are affecting the site)

List of actions/ tasks planned to be undertaken at above site. Please complete.

Proposed LCG actions	Description and methods	Stakeholders/Partners	Timelines
List of actions to improve site and mitigate threats Table 6-1 reference no.	Further detail of actions and methods required to achieve action (eg establish stock proof fencing on east side of riparian zone).	List of other groups, agencies or individuals that could assist or support the action(s)	Proposed completion date

2.List of your priority ISSUES. Please complete and add issues as necessary.

Issue 1 : (add name of issue)
Add description of issue
Threat(s)

Proposed LCG actions	Description and methods	Stakeholders/Partners	Timelines
List actions that address issue Table 6.1 reference no	Further detail of actions and methods required to achieve action	List of other groups, agencies or individuals that could assist or support the action(s)	Proposed completion date

Appendix 4 Conservation status and weed category definitions

EVC bioregional conservation status (BCS)

X	possibly extinct	probably no longer present in the bioregion OR if present, below the resolution of available mapping
E	endangered	less than 10% of former range OR less than 10% of pre-European extent remains (or a combination of depletion, loss of quality, current threats and rarity that gives a comparable status e.g. 10 to 30% pre-European extent remains and severely degraded over a majority of this area; OR naturally restricted EVC reduced to 30% or less of former range and moderately degraded over a majority of this area; OR rare EVC cleared and/or moderately degraded over a majority of this area)
V	vulnerable	10 to 30% of pre-European extent remains (or a combination of depletion, loss of quality, current threats and rarity that gives a comparable status e.g. greater than 30% and up to 50% pre-European extent remains and moderately degraded over a majority of this area; OR greater than 50% pre-European extent remains and severely degraded over a majority of this area; OR naturally restricted EVC where greater than 30% pre-European extent remains and moderately degraded over a majority of this area; OR rare EVC cleared and/or moderately degraded over a minority of former area)
D	depleted	greater than 30% and up to 50% of pre-European extent remains (or a combination of depletion, loss of quality, current threats and rarity that gives a comparable status e.g. greater than 50% pre-European extent remains and moderately degraded over a majority of this area)
R	rare	rare (as defined by geographic occurrence) but neither depleted, degraded nor currently threatened to an extent that would qualify as endangered, vulnerable or depleted
LC	least concern	greater than 50% of pre-European extent exists and subject to little to no degradation over a majority of this area
na	not applicable	the map unit is not a distinct native vegetation type and BCS is not applicable, OR a mosaic / complex that has no extant occurrence and BCS of the components cannot be determined

Threatened fauna status definitions

¹ Victorian Rare or Threatened animal status (DSE 2007): c = Critically Endangered e = Endangered v = Vulnerable n = Near Threatened	² Flora and Fauna Guarantee Act 1988 (Vic): L = listed as threatened under schedule 1 of the Act	³ Environment Biodiversity and Conservation Act 1999 (Cwlth): C = listed as critically endangered E = listed as endangered V = listed as vulnerable CD = listed as Conservation Dependent
---	--	--

Threatened flora status definitions

¹ Victorian Rare or Threatened plant status (DSE 2005a): x = Presumed extinct in Victoria e = Endangered v = Vulnerable r = Rare in Victoria k = Poorly Known in Victoria	² Flora and Fauna Guarantee Act 1988 (Vic): L = listed as threatened under schedule 1 of the Act N = nominated for listing as threatened X = rejected for listing as threatened	³ Environment Biodiversity and Conservation Act 1999 (Cwlth): X = Extinct C = listed as critically endangered E = listed as endangered V = listed as vulnerable
---	---	--

CaLP Act declared weed definitions

Regionally Prohibited Weeds	Regionally Prohibited weeds are not widely distributed in a Region but are capable of spreading further. It is reasonable to expect that they can be eradicated from a Region and they must be managed with that goal. Land owners must take all reasonable steps to eradicate Regionally Prohibited weeds on their land.
Regionally Controlled Weeds	These weeds are usually widespread and are considered important in a particular Region. To prevent their spread, continuing control measures are required. Land owners have the responsibility to take all reasonable steps to prevent the growth and spread of Regionally controlled weeds on their land.
Restricted Weeds	Includes plants that pose an unacceptable risk of spreading in the State or to other parts of Australia if they were to be sold or traded in Victoria, and are a serious threat to another State or Territory of Australia. Trade in these weeds and their propagules, either as plants, seeds or contaminants in other materials is prohibited
